## EDUCATION

### •NIT Kurukshetra

2023-2026

MCA

CGPA: 9.35

### •Panjab Univeristy

2019-2022

BSc. Physics Hons.

## EXPERIENCE

### •BioFieldPower (iHub - AWaDH) @ IIT Ropar

October 2024- March 2025

Hybrid

Intern

- Led a full-stack development of a biomass procurement and logistics platform connecting farmers (suppliers), movers (transporters), and industries (buyers) to streamline biomass sourcing, transportation, and delivery.
- Managed a team of 5 interns, streamlining task allocation and workflow using Trello—improving collaboration efficiency by 40% and reducing delivery delays by 30%.
- Refactored monorepo into separate frontend (Next.js) and backend (Express) with clean architecture.
- Built a multi-farm pickup and partial order fulfillment by multiple movers with real-time capacity tracking.
- Developed a custom notification system for real-time updates on orders, pickups, and verifications.

## PROJECTS

### •Virtual Lab Platform

January 2024 – Present

Tools & technologies used: NEXT.js, Express, Node.js, Typescript, Tailwind Css, MongoDB, Firebase

- Structured and co-designed the backend, integrated Firebase across the stack, and established secure authentication flows including registration, login, email verification, password recovery, and token-based route protection.
- Built 30 + modular APIs and multiple middleware for assignments, classrooms, and tests with schema design, controller logic, route protection, role-based access control, and conditional rendering of role-specific dashboards using cookies.

### •Insaaf (Link)

December 2023 – October 2024

Tools & technologies used: Flutter, Firebase

- Created a full-featured, role-based social networking app using Flutter and Firebase for 3 type of users- law students, lawyers, and civilians
- Implemented custom features with user specific workflows allowing students to explore internships and chat with lawyers, lawyers to accept cases and share legal insights, and civilians to post legal cases and engage in relevant discussions.

### •Voice Assistant - Leo (Link)

July 2024 – September 2024

Tools & technologies used:Flutter, Gemini API

Built a voice assistant in **Flutter** with smooth animations, convert voice into text, integrated Gemini API for intelligent, context-aware responses using conversation history for an interactive user experience

### •MiniGames-Arcade (Link)

January 2024 – April 2024

Tools & technologies used:Java and OOPs concepts

Developed an arcade game emulator featuring 5 mini-games, utilizing core **Java**, swing, and AWT packages, with user-friendly menu interfaces.

## TECHNICAL SKILLS

**Languages:**Java, Dart,C,Python,JavaScript

**Frameworks and Libraries:**NEXT.js, Flutter, Express, React, Bootstrap,Node.js, Tailwind CSS

**Databases:**Firebase, MongoDB

**Tools & Platforms:**Trello, Git, Firebase CLI, Linux

**Soft Skills:** Team and Time Management, Communication, Leadership Skills, Critical Thinking

**Relevant Coursework:** Data Structures & Algorithms, Operating Systems, OOPs, DBMS

## POSITIONS OF RESPONSIBILITY

### •Student Placement Coordinator, Training and Placement Cell

Mar 2025 – Present

Coordinated placement activities impacting 500+ students; liaised and managed recruitment processes with top companies including Goldman Sachs and DE Shaw.

### •Secretary, Mexperts (Technical Society of MCA MBA)

Jun 2024 – Jun 2025

Organized 10+ technical workshops and events.
